

Sticklebricks

- One of the best things about Sticklebricks is the way they encourage creativity, there's no right answer. Children can use their imagination and make something out of nothing. The possibilities are endless.
- Being able to experiment is one of the best ways to learn, there is no set script to follow, no fixed outcome. It promotes curiosity and problem solving.
- When you see children being creative, do you feel like joining in? When was the last time you got down on your hands and knees to play with building bricks?! Where is the space for play and joy in your life?
- Do you feel as if you're following a blueprint, or that you're free to be creative, make mistakes and develop your own ideas?
- Why not take a few risks, try arranging the 'bricks' in different ways, and see what happens?

“Give a child a simple brick and you give them the universe.”

Unknown.
